--it's just a very good story."**

---TV Guide

Strange things happen to Zack Greenburg. The question is, why? Why should this affable 12-year-old, normal in every way, be a magnet for what scientists call "paranormal experiences?" The reason is actually quite simple. Weird things happen to Zack because he knows something most other people don't: that life is strange — full of the odd, the spooky, the inexplicable. And the startling fact is, anyone can see these things if they're willing to open their eyes and look. The paranormal, the spooky, the inexplicable — Zack attracts them all like a moth to a flame.

The Zack Files is based on the popular book series by Dan Greenburg.
